EDUCATION

Anuradha College of Engineering & Technology

Information technology , B.E

CGPA: 7.1

Chikhli, Maharashtra

2022 - July 2026

B.M. Jr. College, Risod

Degree in HSC

Percentage: 88.83%

Risod, Washim

June 2019 - July 2021

SKILLS

Programming Languages: Python, C, HTML, CSS
Libraries/Frameworks: Pandas, NumPy, Matplotlib
Tools / Platforms: VS Code, Git/Github, Jupyterlab
Databases: SQL, Mongo DB

PROJECTS / OPEN-SOURCE

Madhav Ecommerce Sales Dashboard | [Link](#)

Microsoft Power BI, CSV File, DAX

- Designed and implemented an interactive sales dashboard in Power BI to monitor and analyze business performance, leading to data-driven strategic insights.
- Visualized key performance indicators (KPIs) such as Total Sales (\$438K), Profit (\$37K), and Average Order Value (AOV).
- Analyzed monthly data to identify key trends, including a seasonal profit dip between May and September.
- Identified "Clothing" as the top-selling category (62.6% of quantity) and "Printers" as the most profitable sub-category, informing inventory and marketing strategies.
- Provided actionable insights on customer behavior, including top customers and payment preferences (44% COD).

Diwali Sales Data Analysis | [Link](#)

Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

- Performed data cleaning and preprocessing on real-world retail data using Pandas and NumPy.
- Conducted exploratory data analysis (EDA) to uncover customer behavior, sales trends, and product performance.
- Improved customer experience insights by identifying patterns based on state, occupation, age group, and gender.
- Boosted business understanding by highlighting top-selling product categories, helping optimize inventory and target marketing strategies.
- Utilized Matplotlib and Seaborn to create compelling visualizations for stakeholder-ready insights.
